Dear HTRW CX:

I spoke with Sam Bass today about getting a review for the Northeast Cape Feasibility Study (FS). I put the FS on the ftp site for immediate access, along with the Review Request Form, and notified Sam of such. I told Sam I would also send a hard copy and electronic copy of the FS; please find those enclosed.

I regret that I have found fault in my procedure for getting this reviewed by the CX. Though this FS claims to be Final, it has not been released. Therefore, we do have the leeway to respond to comments and make changes as necessary.

I have included a CD which contains all the Remedial Investigations that support this FS. Also, there is a Removal Action Report on the CD which details our best information on the current state of PCBs in soil at Northeast Cape. The CD has PDF files for the Phase I and Phase IV RI Reports. The Phase II and Phase III RI Report are in folders, consisting of many files. To view a more cohesive PDF file of these reports, I'll refer you to PIRS.

Please call with any questions or concerns.

Sincerely,

A handwritten signature in black ink, appearing to be "C. Cossaboom".

Carey Cossaboom  
Project Manager
