In-Active Installation Section

Mr. Larry Tucker  
Remedial Project Manager  
Engineering Field Activities, NW (EFANW)  
Naval Facilities Engineering Command  
19917 7th Ave NE  
Poulsbo, WA 98370

Dear Mr. Tucker:

I enclosed the latest St. Lawrence Progress Report. This discusses both our Gambell and Northeast Cape Projects. I will send you one of these each month. I have placed your name on our list of contacts so you will be notified of meetings and kept up to date on project status.

I also enclosed a copy of the Responsiveness Summary from our meetings in Savoonga, which will give you some feeling for the local concerns. Finally, I enclosed a copy of our Administrative Record Index. The items of possible interest to you begin with Document No. "N" and are on the 2nd and 3rd pages. I can provide you with copies of most of the reports noted, but there are so many reports that you might want to be selective. If you have time, you might want to peruse them when you come up.

If you have time between other duties, I would like to get together with you when you are in town. Sharing information would be beneficial to our respective projects. I can be reached at (907) 753-5617.

Sincerely,

Robert B. Sanders  
Engineering Manager
